Instruction Manual

Congratulations on the purchase of your Fibre Optic Sideglow!

Our Fibre optic Sideglow is made from safe plastic fibre optics and is available in a variety of lengths and sizes.

The Fibre Optic Sideglow has a 30mm termination allowing to be connected to any lightsource, be it passive, interactive, IRiS or another format.

Using the fibre optics is very easy. However, there are a number of safety issues that must be considered before use.

For optimal results, please read and follow instructions carefully.

Please keep for future reference.

Heed all warnings on the product and within this manual. If upon receipt of this product, the user suspects that the product is defective, and/or requires service or repair due to malfunction or damage to the product, please contact the manufacturer immediately. Please be aware that improper installation and/or use or misuse of this product may result in injury, death, or adverse reactions to its user. This product is intended to be installed and/or use by a trained professional. Failure to comply with these precautions or with specific warnings elsewhere in this manual violates safety standards of design, manufacture, and intended uses of the product.

Safety

A risk assessment must be completed for each person who is to have access to the Fibre Optic Sideglow before use.

Do not allow the Fibre Optic Sideglow to be put in a user's mouth, to avoid the risk of cross-contamination or choking.

Ensure the person using the Fibre Optic Sideglow is under constant supervision.

Do not allow the optic to be put around a person's neck.

Instruction Manual

Getting Started

1. Simply locate the termination into a fibre optic lightsource collar and secure.
2. Turn on the lightsource.

Cleaning and Maintenance

The Fibre Optic Sideglow should be cleaned at least weekly in a solution of warm water and non-abrasive cleaning agent (a small amount of washing up liquid should suffice). Soak the optic in the solution and clean with a cloth before rinsing and allow this to dry naturally. Do not place the termination (metal end of the optic) in the solution. This may need to be cleaned more frequently depending on the level of usage. The Fibre Optic Sideglow should be untangled and straightened at least once a week to ensure it is at its optimum condition.

Troubleshooting

Q. No light seen from the Fibre Optic Sideglow.

A1. Is it connected to a Fibre Optic Lightsource? If so, see A2

A2. Is the Fibre Optic Lightsource switched on? If so, see A3

A3. If the Fibre Optic Lightsource is interactive, has it been activated? If so, see A4

A4. Is the lamp operable in the Fibre Optic Lightsource? If so, see A5

A5. Please contact us.
