Congratulations on the purchase of your IRiS LED Colour Panel!

The IRiS LED Colour Panel has been designed specifically for people with special needs and should, if used in accordance with these guidelines, offer years of switching learning and fun!

The IRiS LED Colour Panel offers endless opportunities to develop numerous skills including color recognition, cause and effect, and many more!

The IRiS LED Colour Panel is an IRiS Listener and can be controlled by any number of IRiS Talkers.

Please ensure you read and follow these Instructions carefully before installing or operating the unit. Please keep this manual for future reference.

Heed all warnings on the product and within this manual. If upon receipt of this product, the user suspects that the product is defective, and/or requires service or repair due to malfunction or damage to the product, please contact the manufacturer immediately. Please be aware that improper installation and/or use or misuse of this product may result in injury, death, or adverse reactions to its user. This product is intended to be installed and/or use by a trained professional. Failure to comply with these precautions or with specific warnings elsewhere in this manual violates safety standards of design, manufacture, and intended uses of the product.

Features

- Ergonomic Design
- Completely Silent
- Two operating modes; Calming and IRiS
- Latest LED Technology
- No Lamp Change – LED
- Cool Running
- Hundreds of Shades of Colours
- Low Voltage – transformer supplied
- Easy upgrade/maintenance
- Durable
- Easy to use
- 2 Year Manufacturers Guarantee (Collect and Return)

Pack contents

- 1 x IRiS LED Colour Panel
- 1 x Low Voltage Transformer

Please note: Only use the transformer supplied. Use of a different transformer may result in damage to the product and void the warranty. For warranty information please see separate warranty card supplied.

Getting Started

1. Place the IRiS LED Colour Panel on a flat solid floor or mount securely on a wall.
2. Connect the round XLR connector (silver connector with grey cable) from the Low Voltage transformer to the socket on the side of the unit.

3. Connect the standard mains plug to a mains outlet.
4. The Colour Panel will now illuminate and will scroll through the many colours.
5. Now it's ready to use.
6. Decide which Talker you want to control the IRiS LED Colour Panel with then go to the Pairing section.

Pairing to IRiS Talkers

This procedure is split into 2 sections, one for those who do not have an IRiS Master Pairer and for those who do.

Without a IRiS Master Pairer

Every IRiS Listener has a button on it called a pairing button. To get the IRiS LED Colour Panel to work with a product, first turn on the unit then decide which IRiS Talker you want to control it with – in this example we use the IRiS Qube but all work in the same manner.

Next find the pairing button on the side of the unit and press it. You then need to activate the IRiS Qube within 5 seconds (in this case you would turn the Qube over). The IRiS LED Colour Panel will now change colour every time you turn the Qube if correctly paired, If it does not then repeat the above.

With a IRiS Master Pairer

To get the IRiS LED Colour Panel to work with a product, first turn the unit on then decide which IRiS Talker you want to control it with – in this example we use the IRiS Qube but all work in the same manner. Then find the button on the IRiS Master Pairer that corresponds with it and press it. You then need to activate the IRiS Qube within 5 seconds (in this case you would turn the Qube over). The IRiS LED Colour Panel will now change colour every time you turn the Qube if correctly paired, if it does not then repeat the above.

Cleaning and Maintenance

The unit should be cleaned with a damp soft cloth. A non abrasive cleaning agent may be used for stubborn stains. Ensure no liquid enters the base of the unit.

The unit has been designed for use by people with special needs, however this does NOT mean it is unbreakable. You must ensure the unit is not hit with anything and that no one pulls or pushes the unit.

Troubleshooting

Q. The unit doesn't work.

A1. Is it switched on? If so,

A2. Has the unit scrolled through its colors? If so,

A3. Have you paired the unit to an IRiS Talker If so,

A4. Are the batteries in the IRiS Talker fully charged? If so,

A5. Please contact us for further assistance.
